Board Update Q1 FY27

Quarterly update to shareholders, 12 July 2026

Headline

Wastage closed the quarter at 7.4 percent and gross margin at 21.3 percent. Both are past the thresholds we set with the board in January. The business is now contribution positive on every SKU we carry.

Operations

- The Wayanad pre cooling unit went live on 3 May and is the single largest reason wastage fell.
- Route sequencing moved from manual to software on 19 May, cutting logistics cost per kg from Rs 3.90 to Rs 3.10.
- Vehicle four joined the fleet on 22 June, on a 36 month lease.

Commercial

- Eleven net new accounts this quarter, including Lulu Convenience in Kozhikode.
- Nesto Hypermarket has extended from one store to four.
- Two accounts lost, both on payment terms we were not willing to extend to 60 days.

People

- Two hires in field quality, one in finance. Headcount is 18 full time.
- We are searching for a Head of Retail Sales, with an offer out.

Cash

Rs 11.4 lakh monthly burn against Rs 1.9 crore in the bank. Runway to September 2027 before this round.

Ask of the board

Introductions to institutional buyers in Thrissur and Palakkad, and to seed investors who have backed supply chain businesses outside metros.
