

Capability Statement

Services, assets covered and delivery

Assets we inspect

- Port infrastructure: wharf structures, quay cranes, breakwaters and jetty piling.
- Power transmission: towers, conductors, insulators and right of way encroachment.
- Plantation estates: canopy health, gap analysis, yield estimation and boundary survey.
- Industrial structures: flare stacks, chimneys, storage tanks and overhead water tanks.

What a cycle includes

A pre flight survey and permission handling, the flight itself against a stored plan, defect detection on the imagery, and a report with every finding located, measured, photographed and severity ranked.

Turnaround

Flight to report in 72 hours as standard, 24 hours on the expedited tier. Raw imagery is handed over in every case, so the client is never locked in.

Safety record

46 cycles, 1,100 sorties, zero reportable incidents. Every flight carries public liability cover of Rs 5 crore and every pilot holds a valid DGCA remote pilot certificate.
