Company summary, July 2026

What Anvaya does

Anvaya AI organises Indian domain experts, principally practising doctors and advocates, into a reviewed data pipeline for frontier AI labs. Experts correct and rank model output in their own field, and Anvaya delivers it as a versioned dataset with provenance on every item.

Why labs buy

- Judgement data in medicine and law that cannot be scraped from the open web.
- Published inter annotator agreement, currently 0.89, rather than an unverified claim.
- Indian cost base at the same standard of professional judgement.
- An Indian entity handling Indian source material, which the rules increasingly require.

Where the business stands

Contracted ARR, July 2026	Rs 3.10 crore
Frontier lab customers	3, two US and one India
Expert reviewers on panel	612 doctors and 140 advocates
Reviewed items delivered	1.84 million
Inter annotator agreement	0.89 Cohen kappa
Blended price per reviewed item	Rs 41
Gross margin	58 percent
Monthly burn	Rs 24.6 lakh

What the round funds

Reviewer acquisition to 2,000 experts across four domains, provenance and adjudication tooling, and a United States facing commercial team.
