What Kadal does

Kadal Systems makes a satellite terminal for small fishing vessels that provides distress alerting, weather warnings and catch logging beyond mobile coverage. Hardware is sold once and connectivity is sold annually.

Why an owner buys

- A crew that can be reached, and reached quickly, in the 37 events where it mattered.
- Weather warnings before the boat commits to a run, not after.
- A catch log per trip, which is what settles the crew share argument on shore.
- Position history, which owners of three or more boats use to manage their fleet.

Where the business stands

Units deployed	3,100
Units bought at full price, no subsidy	240
Units under state subsidy scheme	2,860
Annual connectivity subscription	Rs 1,800 per vessel
Subscription renewal rate, year 2	71 percent
Distress alerts relayed	37, including 9 rescues
Hardware gross margin	31 percent
Monthly burn	Rs 8.1 lakh

What the round funds

Terminal inventory ahead of the post monsoon season, a direct sales team focused entirely on full price sales, and a next generation terminal at less than half the current bill of materials.
