

Platform Delivery Record

On time delivery and rejections, FY27 to date

Delivery record

868 hours delivered in July 2026 against 902 committed, with 34 hours rolled into August at the customer's request. On time delivery across Q1 FY27 was 97.2 percent.

Rejections

Eleven hours were rejected on first delivery in Q1 FY27, 0.5 percent of volume. Nine were lip sync failures on rapid dialogue and two were terminology errors in a medical drama. All were re delivered inside 24 hours.

What customers escalate

The most common note is not accuracy, it is performance. A line can be correct and still land flat. This is why the creative director sits above the pipeline rather than beside it.
