

Verdant Climate Pitch Deck

Seed deck, August 2026

What they do

Carbon measurement and verification for smallholder agroforestry.

Where the business stands

Programme	Business Incubation Programme
Hectares under contract	4,100
Smallholders covered	2,600
Annualised revenue	Rs 1.42 crore
LIVE seed assistance	Rs 25 lakh
Raising	Rs 6.5 crore seed
Gross margin	58 percent
Monthly burn	Rs 11.8 lakh

The team

- Remote sensing lead. Doctorate in remote sensing, six years on land use change modelling.
- Carbon markets lead. Took two agroforestry projects through Verra validation before this.
- Field operations lead. Ran a state agricultural extension programme across three districts.

The raise

Raising Rs 6.5 crore. IIMK LIVE portfolio company, introduced through the Matching Investment Program.

What we would still watch

- Registry acceptance of the methodology is not yet final on two of three projects.
- Voluntary carbon prices are volatile and buyer concentration is high.
- Field sampling cost rises if registries tighten ground truthing requirements.
