Company summary, August 2026

What they do

Analog front end IP for industrial sensing, licensed to Indian fabless houses.

Where the business stands

Programme	DEEP LEAP, Cohort 2
IP blocks taped out	3, on 180 nm
Evaluation licences signed	2
Royalty revenue	Pre revenue
LIVE seed assistance	Rs 30 lakh
Raising	Rs 9.0 crore seed
Team	7 full time
Monthly burn	Rs 14.2 lakh

Risks the company states itself

- Royalty conversion from evaluation to volume is unproven.
- Design cycles at customers run 12 to 18 months, so revenue is slow to appear.
- Single foundry relationship for the 180 nm process.
