Company summary, July 2026

What Kalpana does

Kalpana Robotics runs a two semester robotics and embedded systems lab inside tier 2 engineering colleges, on its own equipment, with a curriculum written from live job descriptions. It then runs the hiring rounds with its employer partners on campus.

Why colleges buy

- Placement rate is what a college sells to next year's admissions.
- Median first salary on the programme is Rs 4.6 lakh against a Rs 2.8 lakh baseline.
- No capital cost. The lab equipment belongs to Kalpana.
- The college is billed per student per term, so the cost tracks the intake.

Where the business stands

Contracted ARR, July 2026	Rs 2.06 crore
Colleges under contract	34, across Kerala and Tamil Nadu
Students trained to date	4,820
Placement rate on the placement track	71 percent within 6 months
Median first salary	Rs 4.6 lakh, up from a Rs 2.8 lakh campus baseline
Employer partners hiring	46
College renewal rate	88 percent
Monthly burn	Rs 12.4 lakh

What the round funds

Trainer hiring and a residential trainer academy, lab kits for forty more colleges, and an employer side team, because the placement is the product.
