Company summary, July 2026

What Metricon does

Metricon Interconnect designs, tools and manufactures precision electrical connectors in Coimbatore for electric vehicle and industrial automation customers, replacing imported parts at 22 to 31 percent below landed cost with four week lead times.

Why customers switch

- Four week lead times against 10 to 14 weeks on an import.
- Design changes handled in the same city rather than across a language and a time zone.
- 184 parts per million defect rate against a customer limit of 500.
- A second source that is not exposed to Chinese supply or tariff risk.

Where the business stands

Revenue, FY26	Rs 6.40 crore
Run rate, July 2026	Rs 9.80 crore annualised
Parts approved by customers	41 part numbers across 9 customers
EV share of revenue	58 percent, up from 21 percent
Gross margin	34 percent
Parts per million defect rate	184, against a 500 customer limit
Import substitution per part	22 to 31 percent below landed Chinese cost
Monthly burn	Rs 9.20 lakh, EBITDA near breakeven

What the round funds

An in house plating line to remove the single vendor dependency, two more moulding machines with tooling for twenty new part numbers, and working capital for automotive payment terms.
