

Cohort Snapshot

IDEA VAULT Cohort 1, August 2026

The cohort at a glance

Cohort company	Sector	Campus	Stage	Raising	Status
Aether Semiconductors	Semiconductors	Kochi	Seed	Rs 9.0 crore	In market
Verdant Climate	Climate tech	Kozhikode	Seed	Rs 6.5 crore	In market
Orbitfall Systems	Space tech	Kochi	Pre seed	Rs 4.0 crore	Preparing
Praan Robotics	Robotics	Kochi	Seed	Rs 7.5 crore	In market
Quantiva	Quantum safe security	Kozhikode	Pre seed	Rs 3.5 crore	Preparing
Sarva Health AI	Health AI	Kozhikode	Seed	Rs 8.0 crore	In market

How they were selected

118 applications, 34 first round interviews, 12 shortlisted for the bootcamp and 6 admitted to the cohort. Selection weighted proof of concept and founder domain depth over polish of the deck.

Sector mix

The cohort deliberately follows the DEEP LEAP sectors: semiconductors, climate technology, space technology, robotics, quantum safe security and health AI. Four are at the Kochi campus and two at Kozhikode.

What this room is for

Every company below has a full data room of its own. This room is the index. An investor opens it once, reads the profiles, and asks for access to the rooms they want. LIVE sees exactly which profiles were read and by whom, which is the part that does not exist today.
