

Investment Committee Process

How a company reaches an investor through LIVE

Selection

Applications are screened by the LIVE team, then interviewed. Companies admitted to incubation are reviewed by the Investment Committee, which includes IIMK alumni operators and investors.

Seed assistance

Seed fund assistance is decided by the committee against milestones rather than a fixed schedule. Rs 13 crore has been deployed across the portfolio to date.

Introduction to the network

A company is put in front of the investor network when it is judged fundraise ready, which in practice means a validated model, evidence of demand, and a data room that will survive diligence.

What LIVE does not do

LIVE does not recommend an investment and does not represent any company's figures as verified. Every number in this room is founder reported.
