

Quality and PPAP Record

Production part approval and defect history

Approval status

41 part numbers at PPAP level 3 approval across nine customers. Six further parts are in the sample and validation stage with two customers.

Defect history

Quarter	Revenue (Rs lakh)	EV share %	Part numbers	PPM defects
Q1 FY26	112	21	18	412
Q2 FY26	138	29	24	338
Q3 FY26	176	38	31	266
Q4 FY26	214	49	36	211
Q1 FY27	245	58	41	184

Systems

IATF 16949 certified in March 2026 following an eighteen month preparation. ISO 14001 certified. Full traceability from copper coil lot to shipped box, retained for seven years as the automotive customers require.

Customer complaints

Four customer complaints in FY26, all closed. Two were plating thickness variation from the outsourced vendor, one was a packaging damage issue in transit, and one was a drawing revision our side had not picked up. The plating complaints are the direct reason the in house line is the first line item in this round.
