*Company summary, July 2026*

## What Thooval does

Thooval Studios dubs and subtitles streaming content into nine Indian languages using speech synthesis for the first pass and a dubbing director plus voice artist for the final one. Rs 38,000 a finished hour against roughly Rs 1.4 lakh traditionally, in 31 hours rather than 6 to 9 days.

## Why platforms buy

- The back catalogue becomes economic to translate, not just the flagship titles.
- Turnaround fits a weekly release schedule instead of blocking it.
- Every voice artist is under a consent and royalty agreement, so the rights are clean.
- Nine languages from one vendor with one delivery specification.

## Where the business stands

|                             |                                                     |
|-----------------------------|-----------------------------------------------------|
| Contracted ARR, July 2026   | <b>Rs 1.64 crore</b>                                |
| Hours of content delivered  | <b>4,180</b>                                        |
| Languages supported         | <b>9 Indian languages plus English</b>              |
| Turnaround per episode hour | <b>31 hours, against an industry 6 to 9 days</b>    |
| Cost per finished hour      | <b>Rs 38,000, against Rs 1.4 lakh traditional</b>   |
| Voice artists on panel      | <b>90, all under consent and royalty agreements</b> |
| Platform customers          | <b>4 OTT platforms, 11 production houses</b>        |
| Monthly burn                | <b>Rs 14.2 lakh</b>                                 |

## What the round funds

Three more language pairs, a second mixing suite in Kozhikode, and a sales team calling on platform localisation heads in Mumbai and Hyderabad.
